INFORMATION REPORT  PREPARED AND DISSEMINATED BY CENTRAL INTELLIGENCE AGENCY  CENTRAL INTELLIGENCE AGENCY  SUSSE  SUSPECT  WICHAR Equipment Displayed at Geneva  This is UNEVALUATED INFORMATI  1. The Soviet-made nuclear equipment shown at the Geneva "Atoms for Peace" Conference in August, 1955 is generally of a high order from the point of view of design, fabrication, orientation of parts and care of solder joints in lectrical equipment.  2. Geiger counter-tube fabrication was first class. At least one type appeared to be assisted made and experience for solve was experient to currently being produced by automatic machinery. A pair of Soviet tongs I examined were excellent, far superior to any made in the US. I plan to include the design features in my own manufacturing. The well logging scintillation counter was equal to any and overloaded with gadgets, but simple and effective in design.  Jos file in CLA Graphics Neglister are the following. photographs of Soviet-made muclear equipment exhibited at Geneva.  1. The soviet-made muclear equipment shown at the Geneva "Atoms for Fourist tongs in the US. I plan to include the design features in my own manufacturing. The well logging scintillation counter was equal to any and overloaded with gadgets, but simple and effective in design.  Jos file in CLA Graphics Neglister are the following. photographs of Soviet-made muclear equipment exhibited at Geneva.  (1) Register counter tubes and scintillation counter (CLA 180715).  (2) Surface monther tubes and scintillation counter (CLA 180715).  (3) Surface monther tubes and scintillation counter (CLA 180715).
